Marnie McKeown
Purchasing
Ampak Inc. Toronto Branch

Dear Ms. McKeown,

This letter is to certify that the material used in the production of cobalt blue PETE bottles purchased by you are free from bisphenyl A. Both the resin and colorant are suitable for use in food packaging and meet FDA requirements as well as CONEG regulations.

Letters from our suppliers are on file to certify the absence of bisphenyl A from the resin as well as the FDA and CONEG certifications for the colorant.

I hope this letter will satisfy your inquiry. If you require any additional information please contact Paradigm Packaging.

Most sincerely,

Tom Marchetto
